

Good afternoon

My name is mario Perez and i am a parent advocate leader at parents for great camden schools. The reason i chose to be a parent advocate leader was because i am a parent of 4 children attending camden city schools and i feel it is important to be a part of an organization that strives for higher education for all camden city students. At parents for great camden schools we're making sure that parents are a part of the changes.

Our schools have been getting better in camden and i would like for this to continue. We have more school choices then ever before, and we have an easy parent enrollment system that lets parents pick the right school for their children. My child now attends creative arts morgan village academy. We are so happy with the school because, of the new choices they have now available at the school which is helping my daughter make better decisions for college and her future goals. I know that we know have a new leader at the district- acting superintendent Katrina McCombs . I support her and hope that she continues the monument of the last few years, because who better then a person who grew up in camden, went through the district and knows the in and outs of the school system.
